Prioritize Devices & Activities

Block Content

Blast Wi-Fi offers two additional applications to help manage, automate, and secure your network:

ProtectIQ™ delivers home network protection that provides peace of mind.

- » Malicious website protection, anti-virus, and anti-ransomware packet inspection and intrusion detection
- » Traffic monitoring that automatically blocks anything that looks suspicious coming into the home
- » A dashboard to demonstrate how this service is actively protecting the home network
- » Notifications when content is blocked
- » \$4/month, or included with Premium Blast Wi-Fi

ExperienceIQ™ gives you the ability to manage the content, applications, and websites for devices connected to your home network.

- » Enhanced parental controls that give you the ability to enforce Internet usage rules
- » Family profile tools to manage the content and hours of use for each connected device in the home
- » \$4/month, or included with Premium Blast Wi-Fi
